PORTFOLIO 2026

Hi, I'm

Lavanya

I want to become a software developer.

SRM Valliammai Engineering College | B.E. CSE | 1st year

PYTHON LEARNER

FUTURE DEVELOPER

BORAHAE

I PURPLE YOU

Turn the page and meet me

About me

A little hello from me

Hi! I'm Lavanya, a first-year B.E. Computer Science and Engineering student (CSE-2) at SRM Valliammai Engineering College.

I'm at the start of my coding journey, and I'm learning something new every day. My dream is to become a software developer.

I gave this portfolio a BTS theme because I like to put a little purple into everything I make.

Name
Lavanya

Course
B.E. Computer Science and Engineering (CSE-2)

College
SRM Valliammai Engineering College

Year
1st year

Learning
Python

Goal
Software developer

Dream in purple, code in practice,
shine in your own light.

Learning Python

JUST STARTED

My first programming language

I've just started learning Python. I'm working through the basics one step at a time, and every small program I run makes me more excited to keep going.

my_first_program.py

```
name = "Lavanya"
goal = "software developer"

print("Hello, world!")
print("I am", name)
print("I want to be a", goal)
```

PYTHON

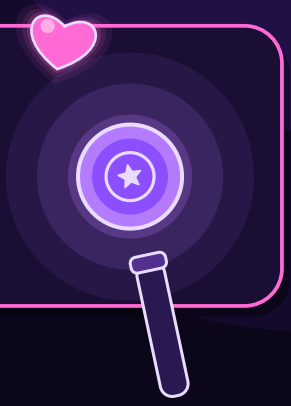

My learning path

- **Print and variables** — Say hello to the world and store my first values. I AM HERE
- **Input and operators** — Make programs that talk to the person using them.
- **Decisions with if and else** — Teach my code to choose what to do.
- **Loops** — Repeat things without writing them again and again.
- **Functions** — Build small reusable pieces of code.

My goal and what I believe in

My goal

I want to become a software developer.

Seven things I keep close while I learn:

Dream big
Every big project starts as a small idea.

Work hard
Practice a little every day, even on busy days.

Never give up
A bug is just a puzzle I haven't solved yet.

Stay kind
Helping others learn makes me learn more too.

Keep learning
There is always one more thing to try and understand.

Believe in myself
I may be new, but I am growing every day.

Enjoy the journey
The learning itself is part of the fun.

7 = FOREVER

Words I live by

Original quotes I wrote to keep myself going

> ***Dream in purple, code in practice, shine in your own light.***

Every expert once wrote a first line of code and had no idea what they were doing.

Bugs are not failures. They tell me where to practice.

Slow progress is still progress. Keep running the program.

I am not behind. I am at the beginning of my own story.

Seven small steps still reach the stage.

Be kind to yourself. Even a computer needs a restart.

Purple is not just a colour. It is a promise to keep going.

Today's Hello, world is tomorrow's big idea.

KEEP GOING

THANK YOU

Let's connect

Thanks for visiting my portfolio. Send me an email and say hi.
